DETAILED ACTION

Page 2

Response to Arguments

1. Applicant is correct in stating a preliminary amendment canceling all claims and assign claims 70-110 had been submitted. This submission was done prior to the first office action and unfortunately due to a clerical error the claims acted upon in the first office action were not claims 70-110. Accordingly this office action acting on claims 70-110 is a non-final office action.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 95-101, 103-108 and 110 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 38-45, 48-51 and 53 of U.S. Patent No. 6,652,378. Although the conflicting claims are not identical, they are not patentably distinct from each other because applicant has merely replaced a few words in the claims with words that have the same or similar meanings. The claims correspond as follows:

Claims from application 10/720850	Claims from patent No. 6,652,378

Application/Control Number: 10/720,850

105	48, 53
106	48, 51
107	48, 49
108	48, 50
110	48 and obvious ivo 43

4. Claims 102 and 109 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 38 and 48, respectively, of U.S. Patent No. 6,652,378 in view of Becker (US 5,297,525). U.S. Patent No. 6,652,378 discloses all the limitations of claims 102 and 109 with the exception of displaying each of the games in a separate graphics window on the same display screen. Becker teaches displaying multiple graphics windows with different information on a single display screen. Therefore, it would have been obvious for one of ordinary skill in the art at the time the invention was made to

display the games of U.S. Patent No. 6,652,378 in multiple graphics windows on a single display screen as taught by Becker, in order to convey multiple types of information to the user simultaneously.

Allowable Subject Matter

5. Claims 70-94 are allowed.
